Request to do Business at Stillwater Airport

Stillwater Regional Airport

To Stillwater Airport Authority:

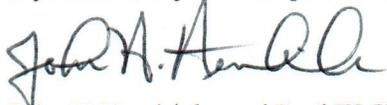

Quality Aircraft Maintenance is seeking permission to conduct aircraft maintenance at Stillwater Airport beginning on or near 1 November 2016. We will be conducting light aircraft maintenance to include Annual inspections, 100hr inspections, oil changes, flat repair and changing of components and maintenance as required or instructed by aircraft owners. Dry cleaning of aircraft will also be available if requested.

Our company will be limited in its early stage with two employees working part time and plan to be open Tuesday, Wednesday, and Thursday until 1 January 2017. At that time we hope to have the shop open from 9am-5pm Monday through Friday with one full time A/P and one part time A/P. Our goal is for 2 full time and 2 part time employees with in 18 months.

John and I have both been in aviation since 1974 and are aircraft owners ourselves. John has over 35 years experience in aircraft maintenance and is a licensed A/P IA. Paul served 26 years flying in the Military and 12 years as a commercial pilot.

Looking at the needs of private aircraft owners in Oklahoma we feel that Stillwater Airport is the best place to open an aircraft maintenance shop to serve light aircraft owners at Stillwater and the surrounding area.

Thank you for your time and consideration. Please feel free to contact either John or Me if you have any further questions.

John H Hendricks and Paul W. Hendricks
