Gary Johnson, Airport Director
Stillwater Regional Airport
2020-1 West Airport Road
Stillwater, OK 74075

Dear Mr. Johnson;

The Federal Aviation Administration and the City of Stillwater are preparing an Environmental Assessment (EA) to evaluate potential impacts of introduction of commercial passenger service to Stillwater Regional Airport. To accommodate anticipated passenger demand, the Airport proposes the expansion of terminal facilities. No property acquisition would occur as a part of this project.

Below is the agreed upon schedule for the completion of the Stillwater Regional Airport EA for the Proposed Initiation of Commercial Service and Terminal Expansion. Note that flexibility has been built into the schedule based on external circumstances. Draft chapters of the EA are currently being reviewed by the FAA prior to preparation of the Preliminary Draft of the EA.

Week of 4/18/2016: Sponsor announces Preliminary Draft EA for 30-day public review.

Week of 5/18/2016: 30-day public comment period on Preliminary Draft EA ends.

We anticipate a one-week turnaround time to respond to public comments but there may be room in the schedule for a two-week period. TBD.

Week of 5/23/2016: Final Draft EA sent to FAA for review – Begins 30-day review period by Flight Standards, Airports and Legal.

Thursday, 6/23/2016 – Monday, 6/27/2016: FAA completes review and submits Flight Standards, Airports, and Legal comments to consultant.

We assume a ten-day turnaround time for the consultant to incorporate FAA's comments on the Final Draft EA into the Final EA.

Airport Director, Gary Johnson

2/15/2016

Page 2

Week of July 25, 2016: Flight Standards and Airports sign the Final EA

July 29, 2016: Flight Standards and Airports issue the Finding of No Significant Impact (FONSI) (if determined)
