STILL PIONEERING

REPORT TO AIRPORT AUTHORITY

SRAA-16-30

Date of Meeting: June 16, 2016

Subject: Approval of LBR, Inc. Amendment No. 1 engineering contract for preliminary design plans and specifications "Reconstruct and Realign the Connecting Taxiway and Diagonal Section of the Parallel Taxiway System to Runway 17-35", FAA grant #3-40-0009-024-2016.

Purpose of Report: Approve Amendment No. 1 for engineering services

Background Discussion: In concert with Federal Aviation Administration and Oklahoma Aeronautics Commission capital programming for construction of the parallel taxiway system in 2017, airport staff has negotiated an amendment to the LBR, Inc. engineering contract for the preliminary design of the project. To comply with FAA requirements, an Independent Fee Estimate (IFE) has been developed and received to indicate the estimate for the cost of specific items within the amendment. The IFE serves as an outside reference for reasonableness of fees for the amount of services delivered.

Once approved by the Authority and City Council, an FAA grant application will be complete and certification documents will be developed and delivered to FAA for the design only grant.

Budget: The cost for the services performed will be covered by an FAA grant at a rate of 90% federal and 10% local funding.

Recommendation: Staff recommends approval of the LBR, Inc. engineering contract for Amendment No. 1 to provide preliminary design plans and specifications "Reconstruct and Realign the Connecting Taxiway and Diagonal Section of the Parallel Taxiway System to Runway 17-35" with a recommendation of approval to the City Council.
