STILL PIONEERING

REPORT TO AIRPORT AUTHORITY

SRAA-16-49

Date of Meeting: September 15, 2016

Subject: Approve Supplemental Agreement #10S with LBR, Inc. for additional engineering services required on the Connecting Taxiway Extension Project

Purpose of Report: Approve LBR, Inc. Supplemental Agreement #10S

Background Discussion: Additional engineering services exceeding above the contracted amount were required to handle additional testing and inspecting services. The additional testing occurred during the construction of Delta 2 when wet and mucky soil was discovered below the existing pavement during pavement removal. This wet and mucky soil required soil stabilization to provide a proper platform for the actual paving to be installed. Since the construction contractor exceeded the construction time by eight days, additional inspection services were required to cover the extended time.

Recommendation: Airport staff recommends the approval of LBR, Inc. Supplemental Agreement #10S for the additional services required on the connecting taxiway extension project with a recommendation of approval by the City Council.
