WATER SERVICE INTERRUPTION NOTICE

DATE: September 26, 2016 (date notice is delivered)

The City's utility contractor is nearing completion of installing an 18-inch water transmission line in your area and will connect it to the existing water distribution system at 44th Avenue. A new water valve will also be installed between the Fox Glynn and Timberline neighborhoods.

This will require a temporary shutdown of your water service.

Western Road Transmission Water Line – 44th Avenue Tie-In

We are planning this service interruption to begin on:

Thursday, September 29, 2016 at 8:00 am

Service is expected to be restored within **6 hours**

barring any unforeseen circumstances.

How to minimize water interruptions

- ✓ Turn off lawn irrigation systems the night prior to service interruption.
- ✓ Fill containers or purchase bottled water for drinking and/or sanitation prior to interruption (estimate 1-2 gallons per person or pet).
- ✓ Reschedule non-critical water uses for a different day.
- ✓ Toilet tanks can be manually filled with water and flushed even while the water is off. Considering storing extra water for flushing.

When service is restored, we recommend that you flush water through faucets for a few minutes to remove any entrapped air.

Thank you for your patience. If your water service is not restored in the allotted time please call **533-8048** or after 5 p.m. call **372-3292**.
